*Allowable Subject Matter*

1. Claims 2-4, 6-8, 10, and 12 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Independent claims 2, 10, and 12 are drawn to a print controller and corresponding method. The print controller brings colors rendered in a first and third color space into correspondence with each other in a second color space. Claims 2, 10, and 12 identify the uniquely distinct features of "a step for extracting a plurality of colors rendered only by a specific color component value from both said first profile and second profile; a step for carrying out interpolation, referring to colors calculated from either profile, to increase the number of colors rendered only by the specific color component value; a step for, if the colors increased in number and a plurality of said colors calculated from the other profile are within a predetermined color difference in the second color space, taking them as the same color and combining them to thereby establish the correspondence in said second color space; and a step for defining the correspondence between color component values in the first color space and color component values in the third color space over the whole range of value of the specific color component by interpolation referring to the sets brought into correspondence." The closest prior art, Yoda et al. (US 5502580 A) either singularly or in combination with other cited references fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
